

PipeDock® from CSD Systems is part of the unique custom solutions range of products aimed at meeting the needs of specific customers.

The PipeDock system was originally developed to meet a specific customer requirement. It comprises frames and covers specifically designed for working on pipe work.

KEY BENEFITS

- Designed and built on the principles of rapid assembly, portability and durability
- Heavy-duty Fire Retardant 1000 gauge poly construction
- Long skirts to ensure good ground contact
- Zipped entrance at front and back of tent for easy access to varying sizes of pipe work
- Sturdy Heavy duty Aluminium folding frame for fast easy assembly and transportation
- Complete pack includes both covers, frame and wheeled carry bag

Specification

- The PipeDock cover is fabricated from 1000 gauge (250µm) Fire Retardant polythene.
- The seams are stitched with reinforced corners added designed to withstand heavy use for prolonged periods.
- The cover is made to tightly fit the PipeDock frame. This enables rapid installation without the use of tape.
- When erected the standard PipeDock measures 210cm x 210cm height rising to 230cm in centre
- Weights: Frame 21Kg, Cover 8Kg

The PipeDock frame is purpose-built from heavy gauge Aluminium.

It is designed to span pipe work of various dimensions and is open at the bottom to allow direct access to the working area.

The frame is based on a concertina structure and can be adjusted to several heights to suit the working area. The frame folds down for ease of transportation.

The whole unit weighing 30Kg, allows it to be maneuvered into place by two workers.

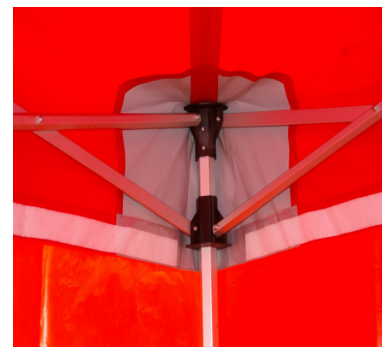

Where time is particularly tight, such as night working on Power Stations, Oil Rigs etc. the unit can be constructed complete with the polythene cover before being moved to the working area. It is then just a matter of minutes before work can commence.

PipeDock Cover Pack

The PipeDock Cover Pack contains just about everything you might need to set up the system. Comprising:

- 1 x PipeDock FR tent
- 1 x concertina frame
- 1 x carry bag on wheels

The covers for the PipeDock are available separately.

Various sizes and fabric covers are available on request
