

The WorkDock® from CSD Systems lets you work outside in all weather in a spacious dry enclosure.

The WorkDock is a fully portable workspace that can be erected in minutes to provide a light sheltered environment. It is designed to prevent dust, liquid waste or working materials from escaping into the surrounding space. This has benefits for health and safety and customer relations.

KEY BENEFITS

- Lightweight highly portable design
- Installed in minutes using innovations from modern camping equipment
- Lasts for months of daily use
- Protects the ground and surrounding environment
- Suitable for all seasons
- Equally useful for work that creates dry dust or liquid mess
- Sturdy steel poles and reinforced tarpaulin construction

Specifications

The WorkDock cover is made from reinforced tarpaulin making it especially strong and resistant to tearing.

The WorkDock concertina frame is made from coated steel tubing, to resist corrosion.

When erect, the WorkDock measures 3m by 3m by 2.5m at the highest point. It folds down to 1m by 50cm by 50cm and comes complete with carry bag on wheels for easy transportation. Other sizes available on request.

A reinforced floor is available for added insulation and strength and may be ordered separately.

Approximate weights: frame 23g, Tent and groundsheet: 10kg,

CSD's WorkDock is a portable outdoor workshop that goes up in minutes. It is intended for use by the construction and renovation industry as a means of providing a comfortable working environment and preventing construction dust or spillage from contaminating the premises being worked on.

The WorkDock comprises a reinforced tarpaulin cover, ground sheet and a sturdy painted steel concertina frame.

Transparent window area let in light to work by. The large entrance panels unzip and roll up for maximum ventilation. When rolled down they minimise the escape of dust while still providing ventilation.

Ideal for:

- Cement mixing
- Paint preparation
- Preparation of anti-infestation chemicals
- Tile cutting
- Sawing wood or MDF
- Cutting Brick or stone work

The WorkDock lets you work safely and comfortably outside without creating a mess or damaging property.

Installation

Installation is simple:

Open out the tent and ground sheet in the area it is to be installed.

To erect the frame, gradually pull the frame into position as shown in the supplied instructions. Bring the frame to half height and place the tent over the frame.

Place erect tent on to ground sheet and seal bringing the sides up onto the Velcro strip system around base of tent.

If the area is subject to high winds or other forces likely to de-stabilise the WorkDock attach WeightDock® stabilisers to the legs.

If using the reinforced flooring, unpack, unfold and place in position inside cover on ground sheet.

Folded concertina frame
